MARKDOWN MADNESS

STATIC SITES FOR FUN & PROFIT

Gilbert Sanchez

@HeyItsGilbert

Agenda

- Markup? Markdown?
- Static Sites
- Tools
- Demos
- Q&A

Thanks

Hey! It’s Gilbert

- Staff Software Development Engineer
- ADHD 🌶️🧠
- Links.GilbertSanchez.com

But First... A Warning

This talk is mostly about markdown... but anything goes when it comes to static generation!

What is Markdown?

A lightweight markup language for easily formatting text.

What is Markdown?

A lightweight **markup** language for easily formatting text.

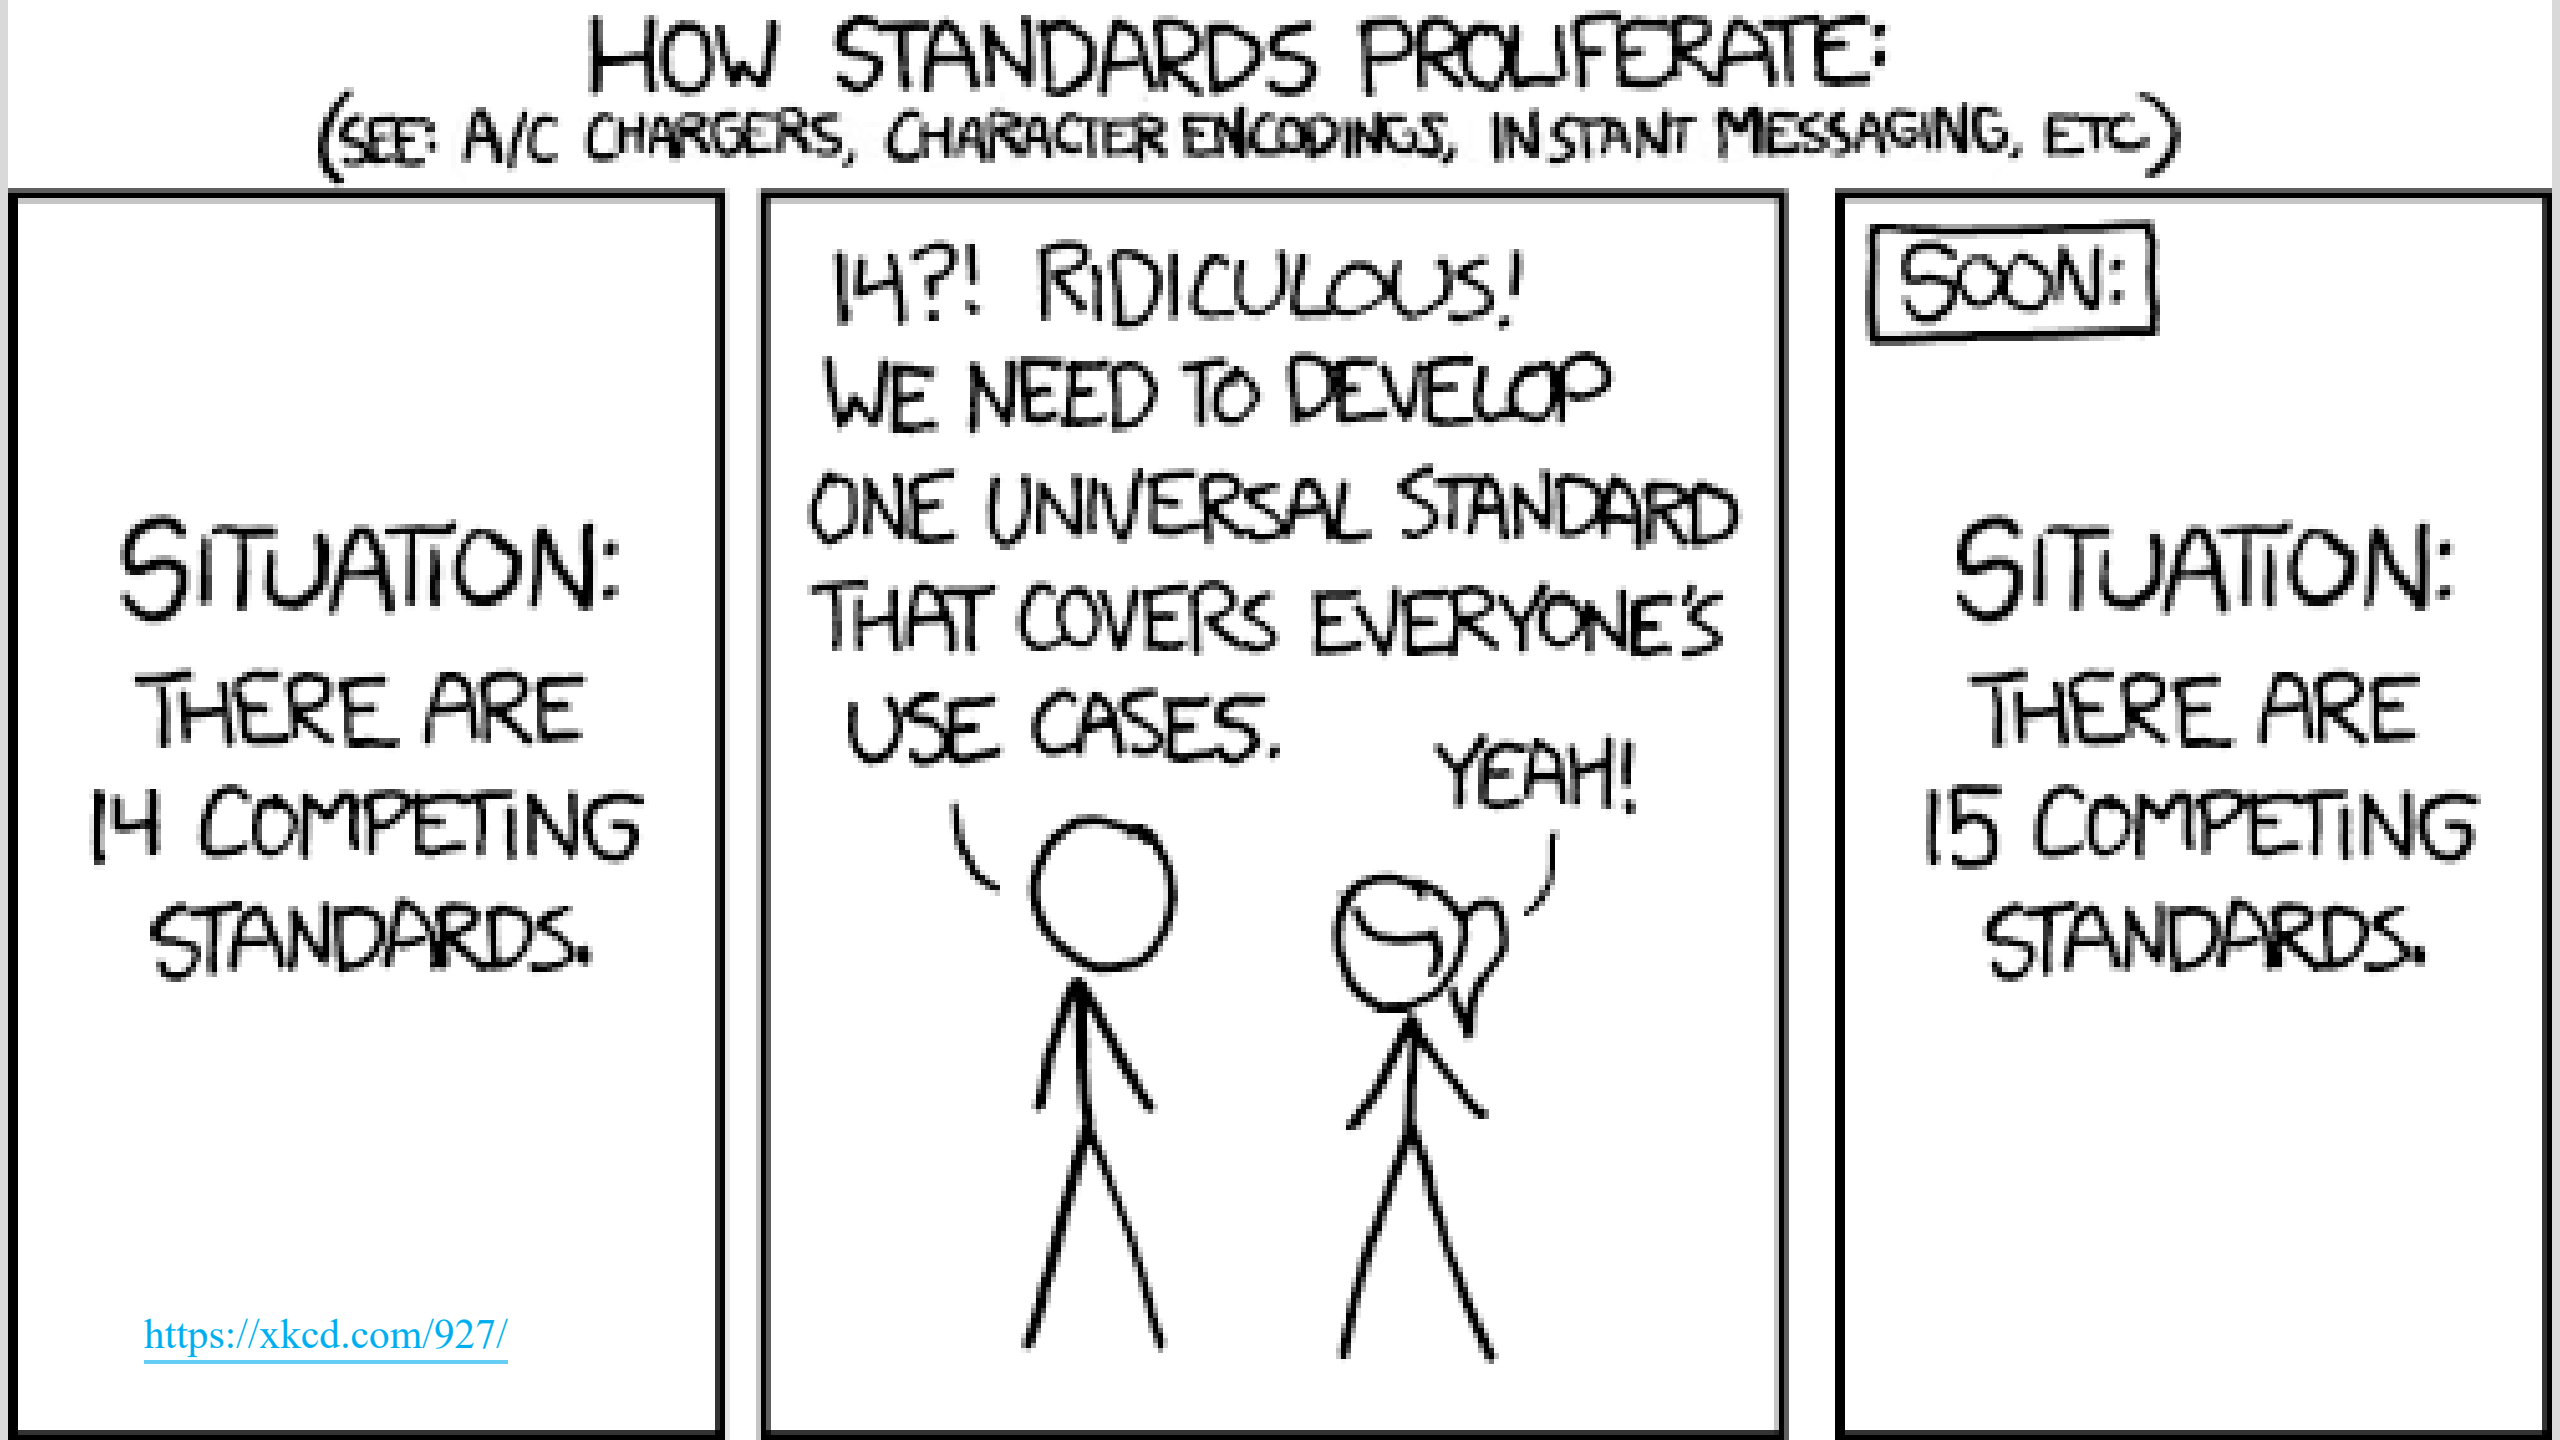
- Markdown (md)
- Asciidoc (adoc)
- reStructuredText (reST)

You think this is PowerPoint you're watching?

Flavor Examples

- ~~Strikethroughs~~
- Footnotes [^1]
- ^Superscript
- Tables
- Math
- Mermaid
- [x] Task List

[^1]: Give 5 stars



https://xkcd.com/927/

Hello world time

```
# Hello

Hello world!

## Turtles

I *like* them!
```

Hello

Hello world!

Turtles

I *like* them!

Front Matter

Front matter is YAML provides metadata or configuration.

```
---
title: Hello
---
# Hello

Hello world!
```

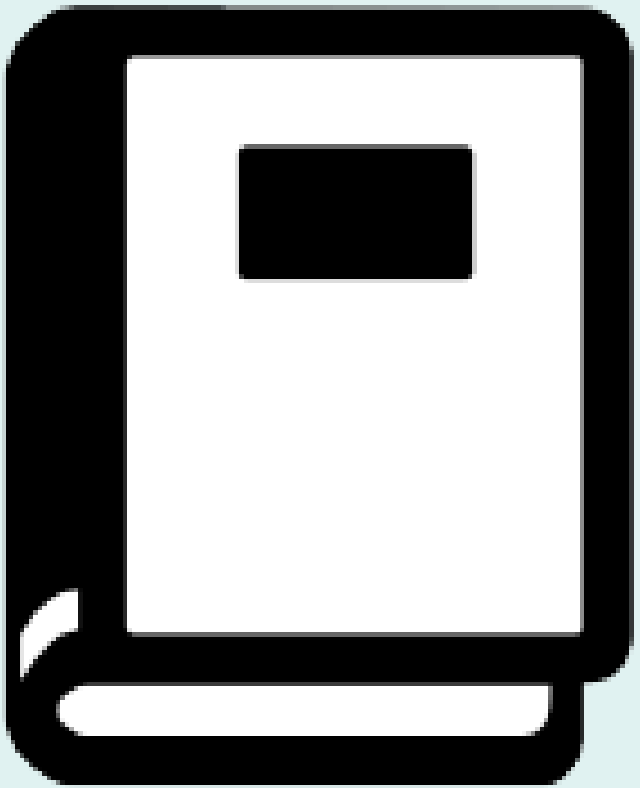
Static Sites

Static sites are:

1. CLI-generated
2. Output as HTML
3. No runtime server.

Jekyll

- Written in **Ruby**
- Great for docs and blogs
- GitHub Pages built-in support
- Liquid templating
- Mature ecosystem with many themes

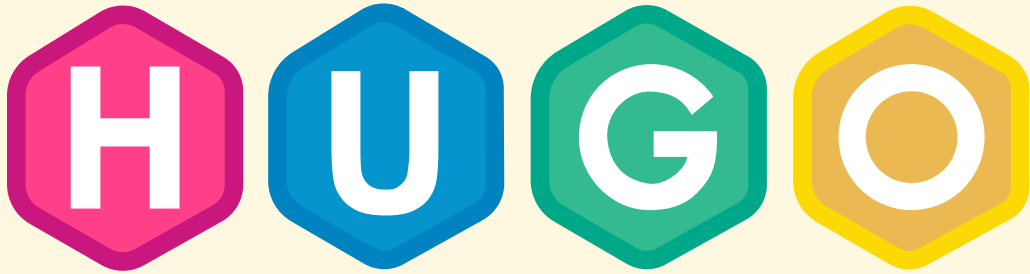


MkDocs

- Written in **Python**
- Purpose-built for documentation
- Material for MkDocs theme is excellent
- Simple `mkdocs.yml` configuration
- Live reload dev server

Hugo

- Written in **Go**
- Blazingly fast builds
- Docs, blogs, portfolios, and more
- Powerful templating and shortcodes
- Single binary, no dependencies



Docusaurus

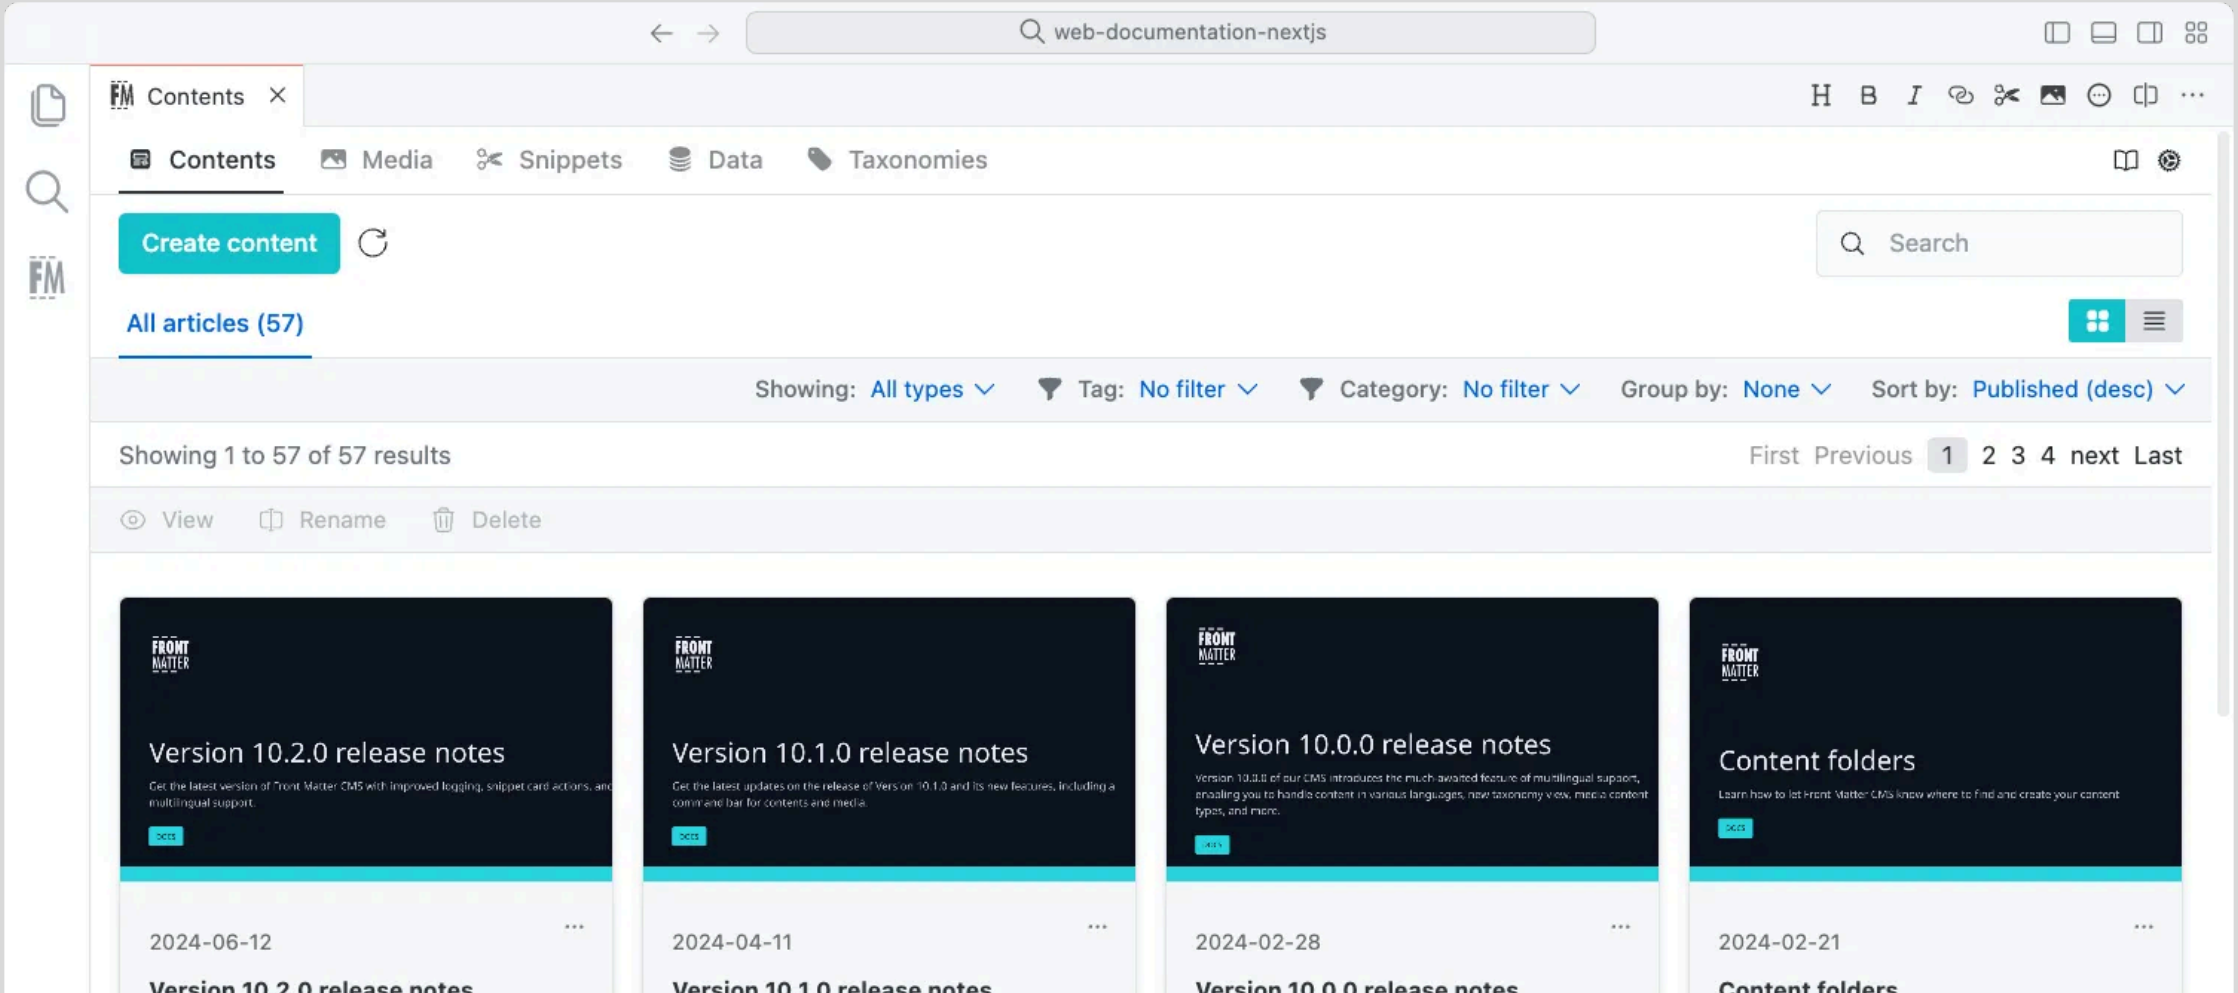
- Written in **React**
- Built for documentation sites
- MDX support (Markdown + JSX)
- Versioned docs out of the box
- Built-in search and i18n

VSCode Extensions

- GitHub Markdown Preview
- markdownlint
- Reflow Markdown
- Markdown All in One
- Marp for VS Code

FrontMatter CMS

VSCode Extension to punches above it's weight class.



Tools

- markdownlint: Markdown best practices.
- Vale: Prose syntax.
- alex: Catch insensitive writing.
- Docker: Run in a container.

Maybe Your Favorite LLM?

Deploying Services

- GitHub Pages
- Netlify
- Cloudflare
- Vercel
- So many more...

Demo Time
